

Wellbeing Award

The Spine by AHR

The project exemplifies the empathy and understanding that is inherent within the ethos of the Royal College of Physicians. The interior spaces and finishes are sympathetic to the needs of the occupants, exhibiting a sustainable understanding of the need for interaction among a community of users, while also signalling the 21st century forward-thinking attitude of the physicians themselves. The building is a new landmark on the skyline of Liverpool and an impressive testament to a city looking to the future.
